Professional summary

- Over **11+ years** of result oriented IT industry experience.

- Experience in Full stack development of Web Based Applications using various Microsoft .Net Technologies.

- Experience in Technologies like .Net Core 2.0,Micro Services, Web APIs, Entity Framework,Html 5.0,.Net 4.0,.NET 4.5, WCF, ASP.NET ,MVC, VS 2017/2015,C#,AJAX,Angular 4.0,TypeScript,JavaScript, SQL server 2014/2008R2, NoSQL MongoDB, TIBCO\Kafka,Azure

- Experience in Object Oriented Design and Development, SOLID Principles, Microservices and TDD.

- Experience with version management tools like Git Hub,TFS,Tortoise SVN.

- Proficient in understanding RFCs / specifications and implement to specifications.

- Experience in solving end user problems in a production support capacity.

- Highly motivated team player, proactive, quick learner and proven record of capability to work under deadlines.

- Exposure in Project Life Cycle (SDLC concepts) and Agile Development methods in Project Management

- Active participation in Design Workshops with Business and Technical Teams.

- Possess excellent communication, interpersonal skills and the ability to work both as a team player and as an individual contributor

Work experience

Working as a Senior Technical Associate at Tesco Technologies from Sapient Inc. from August 2018 to till date

Worked as a Technical Lead in McAfee Software India Pvt Ltd from Sep 2008 to June 2018

Educational Qualifications

MCA from NIELIT, New Delhi
BCA from Bangalore University, Bengaluru

IT Skill Set

.Net Technology	: .Net Core 2.0, C#,WCF,MVC,ASP.NET,WebAPI,.Net Framework 4.5/2.0,Entity Framework
Scripting	: JavaScript, TypeScript 2.0,Jquery,Angular 4.0, RxJS
Languages	: C#, TypeScript, JavaScript
Application Server	: IIS 6.0 / 7.0
Version Controls	: VSS, SVN and Git Hub
Databases	: SQL Server 2008 R2/2016, MongoDB
Cloud	: Azure
Monitoring Tools	: Splunk, Run Scope
Project Management	: JIRA, Zen-Desk, MS Teams, Version One
Test Tools	: NUnit, XUnit, Coverity, SonarQube, Spec Flow, SOAP UI,PostMan
CI\CD (DevOps)	: Jenkins, Git, Docker
Security	: AES Encryption, GDPR, OAuth

Achievements

- ✦ Technology Consultant.
- ✦ Active Participation in Legal changes (GDPR) across UK and Central Europe.
- ✦ Conducted Workshops and training programs for Development teams and Support teams
- ✦ Experienced in working with clients directly from US , UK.
- ✦ Received Rewards and recognition as an Individual and Team from Stake holders.

Projects

Project Name	Stored Value, Clubcard and GDPR
Client	Tesco Technologies
Role	Senior Technical Associate (L2)
Duration	Sept 2018 to Till date
Team Size	12
Tech Stack	Web API 2.0,Azure,Micro Services,C#, WCF, Entity Framework, SQL Server 2014, Visual Studio 2017, Git Hub, SOAP UI,PostMan,swagger, Splunk

Description: A High performance Web API to serve the customers to aquire, merge and split the Clubcards, Debit and credit points to their clubcards. A redemption system, which is an integral part of Tesco middleware APIs to enable multiple upstream and downstream applications to perform points transactions. It offers a Identity based access and role based authorization for the operations. As part of making the apps and services GDPR compilant, multiple security measures have been provisioned with both legacy and current services, such as Identity base Auth, PII data filtering, service securtiy, Data Encryption and so on.

Project Name	Master Price Book
Organization	McAfee
Role	Technical Lead
Duration	May 2017 to Apr 2018
Team Size	13
Tech Stack	ASP.Net MVC, C#, .Net Core 2.0, Angular 4.0, Type Script, Entity Framework, SQL Server 2012, Visual Studio 2015, GIT

Contributions:
1. Coding
2. Estimation of work
3. Performing Acceptance testing and Unit testing
4. Writing Stored procedures in SQLSERVER 2012
5. Creating Technical specification design document
6. Code review is done for other developer's code to ensure the code quality is as per the standards
7. Deploying the applications in Non Production servers

Description: A Single Page Application (SPA), which automates the pricing changes for the products and subscriptions for the global product portfolio. It offers single source of truth for subscription pricing. It involves integration of various other subsystems like, Products, Pricing, Retail, Marketing, Reporting and Administration. Thus, ensures consistency across and eliminate any manual errors. It provides a role based access to the various features of price management and roll out of new prices to different regions, locales across the globe. An approval based price change request has been implemented, which helps the pricing teams to compare, rationalize, compliance check and then roll out the price changes for the current and feature dates.

It offers a strong Audit Trail feature, through which every change in the system is administered and history of changes can be tracked, thus ensuring the total control of data change.

Contributions:
1. Responsible for estimation
2. Design and development
3. Involved 80% as individual contributor
4. Conducting scrums, Code Reviews
5. Application Support
6. Status reporting

Project Name	PRD Tool and Services
Organization	McAfee
Role	Lead Engineer
Duration	July 2013 to March 2017
Team Size	9
Tech Stack	Microsoft.NET 4.0 Framework, Visual Studio.NET 2010, ASP.NET MVC,C#, JavaScript, Jquery, SSRS, SVN, Sqlserver2008 R2, Windows 7

Description: **PRDTool Portal**: It provides highly customizable user interface to suit the dynamic needs of the client partners. Its developed with ASP.Net MVC 3.0 and JQuery.

PRD Web API: It is a system with efficient data provisioning. Implemented with ASP.Net Web API system.

PRD Services: WCF Services provided to expose the data gathered with PRDTool to other downstream applications.

Continuous Integration: Continuous Delivery of the products with the Partners. For the release versions. REST APIs are used for seamless integration.

Contributions:
1. Estimation of work and Coding
2. Unit and System Testing
3. Creating Technical specification design document

Project Name	Consumer Build And Release Management System (CBRMS)
Organization	McAfee
Role	SSE
Duration	Nov 2008 to March 2013
Team Size	20
Tech Stack	Microsoft.NET 4.5 Framework, Visual Studio.NET 2012, ASP.NET,C#, JavaScript,Windows Service,TFS, Sqlserver2008, Windows 7

Description:

      CBRMS is a portal for Building, Customizing and Releasing McAfee Consumer Products. It comprises of following subsystem:

- **CBRMS Web API**: ASP.Net Web API, built to provide services in the form of APIs to all the internal tools and as well as to the clients.
- **Build System**:Web based application for the user interaction.
- **Core Build Engine**: Window Service Responsible for building all Consumer Core Products. Built on C#.
- **Partner Build Engine**: Window service Responsible for implementing Customization on core products and creating partner customization kits.
- **CDKitWebService**: Responsible for creating a generic CD Kit by combining all the core products. This generic CD kit used for customization and creating Partner Deliverables. Built on C# and WCF

Contributions:
1. Design and Development
2. Creating Technical specification design document
3. Writing unit test cases
4. Unit testing
5. Writing Store procedures in SQL Server 2008
6. Code review is done for other developer's code to ensure the code quality is as per the standards.
7. Interacting with client team on daily basis and production support.
